

IPA's 5th Annual 'Power Scotland' Conference
The Changing Power Landscape
 Tuesday 6th March 2012
 Heriot-Watt University Conference Centre, Edinburgh

Conference Programme

With ambitious renewable energy and climate change targets to meet, and with Scotland generating the bulk of UK's renewable energy supply, there are significant challenges to be overcome to ensure security of supply at affordable cost to the consumer in an uncertain economic climate across the broad church of energy technologies.

Confirmed & Invited Presentations and Speakers:

- ~ The Electricity Generation Policy Statement: Colin Imrie, Scottish Government
- ~ The Challenges of the New Power Landscape: Jill Duggan, Doosan Power Systems
- ~ Next Generation Thermal: Efficient Low Carbon Baseload Capacity for Scotland: Victoria Merton, Ayrshire Power
- ~ Transmission for the New Power Grid: Duncan Burt, National Grid
- ~ The Challenges of Delivering the New Power Landscape: Ian Funnell, SSE
- ~ Why Intermittency Cannot be Ignored – Phil Hare, Poyry
- ~ Wave and Tidal Energy – Capitalising on Scotland's Global Lead: Alan Mortimer, ScottishPower Renewables
- ~ Nuclear: Life Extensions versus New Build – Nigel Knee, Head of Nuclear Policy, EDF Energy
- ~ The Role of CHP & Waste to Energy in Scotland – Colin McNaught, AEA Technology
- ~ Global Energy Opportunities – Ian Brander, Howden
- ~ Continued Operation of 'Opted Out' Large Combustion Plants under the IES Eric Adams, Parsons Brinckerhoff
- ~ Thermal & Renewable Generation working in Combo in a Highly Renewables-heavy System – Keith McLeay, Mott MacDonald
- ~ Smart Grid Opportunities for Scottish Companies – Catherine Brys, Scottish Enterprise

To book your place email your details to: events@ipa-scotland.org.uk

Conference Speakers

IPA's 5th Annual Power Scotland
 The Changing Power Landscape

This annual conference seeks to present solutions from leading experts on the overall energy mix, networks, coal, gas, carbon capture and storage, marine, wind, CHP and energy efficiency.

Confirmed Speakers Include:

Scottish Government	Colin Imrie
National Grid	Duncan Burt
Poyry	Phil Hare
Howden Global	Ian Brander
ScottishPower Renewables	Alan Mortimer
SSE	Ian Funnell
Ayrshire Power	Victoria Merton
Doosan Power Systems	Jill Duggan
Mott MacDonald	Keith McLeay
AEA Technology	Colin McNaught
Parsons Brinckerhoff	Eric Adams
EDF Energy	Nigel Knee
Scottish Enterprise	Catherine Brys

Providing opportunity to engage in the debate and find out how your company can best seize the opportunities of the Changing Power Landscape.

To be kept informed of booking costs and conference arrangements email your contact details to: events@ipa-scotland.org.uk.

EXHIBITION SPACE AVAILABLE

Contact Helen Tulloch for details and availability: H.Tulloch@ipa-scotland.org.uk

Registration information

see below: Page 2

IPA's 5th Annual Power Scotland Conference - 'The Changing Power Landscape'

Heriot-Watt Conference Facilities – Tuesday 6 March 2012

Registration Details:

IPA Members
Conference £150.00 + VAT

Associate Members
Conference £170.00 + VAT

Non Members
Conference £190.00 + VAT

**** (Associated Members include members of supporting institutions and associations)**

EXHIBITION places available

Raise your company profile – stand spaces available on first come basis.

IPA Members £250 + VAT
Non Members £350 + VAT

Don't miss out, limited number of spaces available.
Email your stand application to:
events@ipa-scotland.org.uk

Industrial & Power Association

The Industrial & Power Association (IPA) is the Scottish based group which supports industry to establish and maintain a secure and sustainable position in providing technology, equipment and services to the power industry in the UK and the world market.

The IPA membership is a broad one. It includes generation and network owners & operators, international manufacturing groups, mechanical, electrical and civil consultancies, construction companies, energy specialists, academia and legal advisors.

The interests of IPA members are extensive and span the entire range of existing and emerging technologies and services for the generation and transmission of energy from renewable, thermal and nuclear forms of energy.

The IPA does not promote one technology ahead of another. The IPA strongly promotes technological advancement that secures diverse UK energy supplies and solutions, reduces emissions, adds economic benefit and enhances the nation's skill employment.
